The BL3000 metal gate lock series is another unique product from Borg. Combining a specially designed lockcase with our proven Marine Grade keypads we are able to offer the perfect access control solution for box section metal gates. The lockcase utilises a forend fixing system which increases security and ease of fitting.

The self-locking system has been designed with adjustability and ease of fitment in mind; the latchbolt can be adjusted to suit a variety of box section profiles whilst the latchbolt head is reversible to suit left and right hand hung gates.

Features

- To suits gate profiles 30-60mm on standard fixings
- DKO models now available with override and deadbolt function as standard
- XL latchbolt available to suit profiles up to 120mm (part no. S311a)
- Anti-climb housing & knob turn
- Over 8000 code combinations available
- Easily reversible on site
- Simple installation, two telescopic fixings
- 1000 hours salt spray tested
- Spring loaded latch; adjustable between 65-80mm
- Security fixings
- 20mm bolt withdrawal
